LinkedCPA Invited to Attend Intuit Entrepreneur Day

LinkedCPA, an innovator in work flow management software for accounting professionals has been chosen to attend Intuit's Entrepreneur Day.

LinkedCPA's advanced system allows users to completely manage workflow. Both clients and team members are managed through the Linked Control Panel. Document management, Upload/Download notifications, software hosting and team member assignments are all features of the Control Panel. "LinkedCPA simplifies and streamlines accounting firm's workflow" said Scott West the CIO of LinkedCPA adding "we're both honored and excited to be attending and look forward to future collaboration with Intuit".

LinkedCPA is one of a handful of companies picked to attend this event. Some benefits of using the LinkedCPA Platform include; increased control over time, documents, team members and clients as well as helping firms cut down on costs associated with IT.

About LinkedCPA (<http://www.linkedcpa.com>)

Today, more companies are looking for ways to cut back on office space needs, commute demands and dealing with a mobile world where the best employees for their company might be located 1,000 miles away. LinkedCPA has been working with this community since 1996, and the tools we have developed are unmatched in the accounting world. Our focus is the accountant, and the companies they work with. We take commute and make it telecommute, yet create a bond between accountant and client that feels as if they are sitting in separate offices in the same building.
